Course Syllabus

Department: Physical Education and Integrated Health Care

Date: October 2012

I. Course Prefix and Number: EMCR 130

   Course Name: Certified First Responder

   Credit Hours and Contact Hours: 2 credit hours, 4 contact hours

   Catalog Description including pre- and co-requisites: This course offers basic training to the professional rescuer who arrives first on the scene of a medical emergency. The purpose of this course is to improve the quality of emergency medical care to patients in the pre-hospital setting by personnel involved in on-scene rescue.

   Relationship to Academic Programs and Curriculum including SUNY Gen Ed designation if applicable:

   This course may be used for Physical Education or General Elective credits.

II. Course Student Learning Outcomes:

   The student will:

   1. Identify life threatening emergencies.
   2. Implement immediate steps to correct any life threatening emergencies.
   3. Perform CPR and use an AED.
   4. Administer oxygen
   5. Prevent the patient’s condition from worsening before higher trained EMS providers arrive.
   6. Treat shock, stabilize fractures, bandage wounds and provide other needed care.

   College Learning Outcomes Addressed by the Course: (check each College Learning Outcome addressed by the Student Learning Outcomes)

   □ writing  ☒ computer literacy
   ☒ oral communications  □ ethics/values
   ☒ reading  □ citizenship
   □ mathematics  □ global concerns
   ☒ critical thinking  □ information resources
III. Assessment Measures (Summarize how the college and student learning outcomes will be assessed): For each identified outcome checked, please provide the specific assessment measure.

<table>

IV. Instructional Materials and Methods

Types of Course Materials:

Textbooks, Workbooks, Manikins and various other types of EMS equipment. Instructor will review and reinforce the materials the student has read. The student will be instructed on the various pieces of equipment used in the curriculum.

Methods of Instruction (e.g. Lecture, Lab, Seminar …):

The instructor will lecture. There will be instruction of labs and scenario role playing during the course also.

V. General Outline of Topics Covered:

- EMS Systems
- EMS Systems Communications
- Medical/Legal/Ethics
- Anatomy and Physiology
- Medical Terminology
- Pathophysiology
- Life Span Development
- Public Health
- Pharmacology
- Airway Management, Respiration and Oxygenation
- CPR/AED
- Patient Assessment – Trauma and Medical Patients
  - Scene Size Up
  - Primary Assessment
  - History Taking
  - Secondary Assessment
  - Reassessment
- Medical Emergencies
  - Medical Overview
  - Neurology
  - Abdominal and Gastrointestinal Disorders
  - Immunology
  - Infectious Diseases
  - Endocrine
  - Psychiatric
  - Cardiovascular
  - Toxicology
  - Respiratory
  - Genitourinary/Renal
  - Gynecology
  - Diseases of Eyes, Ears, Nose and Throat
- Shock and Resuscitation
- Trauma
  - Overview
  - Orthopedic Trauma
  - Soft Tissue Trauma
  - Head, Facial, Neck and Spine Trauma
  - Special Considerations in Trauma
  - Environmental
  - Multi-system Trauma
- Special Patient Populations
  - Pregnant Patients
  - Pediatrics
  - Geriatrics
  - Patients with Special Challenge
- EMS Operations
  - Principles of Safely Operating a Ground Ambulance
  - Incident Management
  - Air Medical
  - Vehicle Extrication
  - Hazardous Materials Awareness
  - Mass Casualty Incidents Due to Terrorism or Disaster
