FLCC Course Syllabus

General Information

Date
04/13/2017

Department
Social Science

Course Prefix:
PSY

Course Number:
225

Course Title:
Child Psychology

Course Information

Credit Hours
3

Lecture Contact Hours
3

Catalog Description
Students will be introduced to the study of child development from conception through age 11. In addition to a biopsychosocial approach, child development will be considered from an ecological perspective that includes the influences of families and institutions on the developing child. Special attention will be given to domains of development such as language and play that are important for understanding how children function in childcare settings. This course will focus primarily on the normal development of the child; however, attention will be directed to some of the more common or particularly problematic disorders of childhood. This course will be especially useful to students who plan to work with children or in settings designed for children.

Prerequisites
PSY 100

Grading Scheme
Letter Grade

This course is designated as satisfying a requirement in the following SUNY Gen Ed category

Social Sciences

FLCC Values
College Learning Outcomes Addressed by the Course

Inquiry

Course Learning Outcomes

Course Learning Outcomes

1: Evaluate the methods that are employed to study child development from conception through age twelve.
2: Distinguish between the psychological approaches to child development and their contribution to the field, (e.g. humanistic, behavioral, or psychodynamic approaches).
3: Analyze controversies and issues using psychological approaches to child development.
4: Examine and evaluate the role of family, teachers, and other professionals in facilitating children's development.

Program Affiliation

This course is required as a core program course in the following program(s)

AA Childhood Education
Other - Write In: Approved PSY elective in the AS Psychology degree

Outline of Topics Covered

Outline of Topics Covered in Course

Outline of Topics Covered

1. Theory and research in child development
   a. History, theory, and research strategies
