Governance Constitution
Finger Lakes Community College

PREAMBLE
Governance at Finger Lakes Community College is defined as the responsibility of all members of the campus community - faculty, staff, students, administrators and members of the Board of Trustees - to participate in the decision-making process and in the development of policies and procedures in an environment characterized by openness and mutual respect.

The governance structure at Finger Lakes Community College shall be the primary vehicle for participation in the decision-making process and in the development of policies and procedures, and shall embody the following hallmarks:

Communication: The college community is dedicated to open, consistent, and trustworthy communication between and among all areas of the College.
Participation: Those who will be affected by or responsible for implementing a decision on policy or procedures are entitled to be informed of and have the opportunity to actively participate in collegial and cooperative discussion of the issues, with the explicit recognition that various areas of the College are interrelated and that all have a stake in the governance of the College.
Accountability: All governance participants are responsible and accountable for the proper execution of their role.
Commitment: The college community holds a deep and abiding commitment to understand, respect and participate in governance.
Authority: The statutory authority of the Board of Trustees, president and faculty shall be respected by acknowledging the fact that certain areas are the primary concern of one component of governance either because of exclusive interest or expertise in a matter. While the administration and board of trustees are compelled to consider governance resolutions and recommendations, they are not required to accept or implement them. Administrative rejection of governance resolutions or recommendations should occur rarely and then for specific and compelling reasons which are communicated in writing to the governance structure that made them and subject to collective response.
